- Actualization of parameter "Line category" on SZ (Slovenia);
- The path section Kozolupy-Pnovany on SZDC (Czech) was made doubletrack.

Instruction for modules updating in the ERIC program

- Insert ERIC Desktop DVD of the version 06/2009 into DVD drive.
- Start the ERIC Desktop program (if you already run the program, you must quit it and start it again to release all modules from memory. Then you can follow next steps).
- Select the menu item Services / Modules update.
- In a dialogue box set path to directory „Modules“ on that DVD. This can be done by means of „Drive“ combo box, which contains a list of drivers that are connected to your PC.
- By pressing the „Select“ button, run the modules updating and follow the updating procedure instructions.
- In order to verify whether the update was done correctly you can compare the numbers of modules versions (in the „Help / About modules / About program“ menu item) with the version numbers in this bulletin.

In case that you have received a new module into your license, you should do the standard update twice. Otherwise the new module will not work. (During the first update, the data in license will be changed and during the second update the corresponding module will be copied to your PC according to the mentioned license).

CAUTION!

If you'll see window „Open“ during usage program ERIC desktop and then following notification „OLE error code...“ click the <Cancel> button.

To solve this problem please install package „ERIC_UPDATE_04_2009.exe“ that you'll find on DVD ERIC Desktop 06/2009 in directory \INSTALL. In net versions it's necessary to apply this procedure for every station where application ERIC Desktop is installed.

Complete reinstall of application is not required.

Program displays this notification because of system adjustments of function "automatic loading of exchange lists" and in your operation system required libraries weren't found.
