

Dear business partners,

We are planning an important change in the ERIC program: From January 1, 2010 all updates of the program will only be possible over the Internet. It means that from this date no updates will be sent on DVDs anymore.

More detailed information and settings of the ERIC program concerning this change are available on your DVD in the file "ERIC_update_internet_en.pdf".

The second planned change is to replace the Consignment notes modules in the ERIC program with a separate application called "Documents+". The aim of this change is to make it more comfortable for the users to work with their documents. The current programming environment of ERIC does not allow us to head the development of these modules in the needed direction.

The current Consignment notes modules will be preserved in the ERIC program as they are. From January 1, 2010, however, no development will be carried out and no updates will be issued in connection with these modules.

For current users of the Consignments notes modules in the ERIC program we will be offering special conditions for the transition to the new application "Documents+".

More detailed information about the new product "Documents+" is available on our official web site www.jerid.eu.

New functions

RailMap / Map upgrade

This upgrade contains new map base update for ERIC application.

It is necessary that all RailMap users first uninstall their old version of European digital railway map „PTV Europe City Map Premium 2009“. You can find the complete installation instructions at the end of this Bulletin.

This update also brings new map control features:

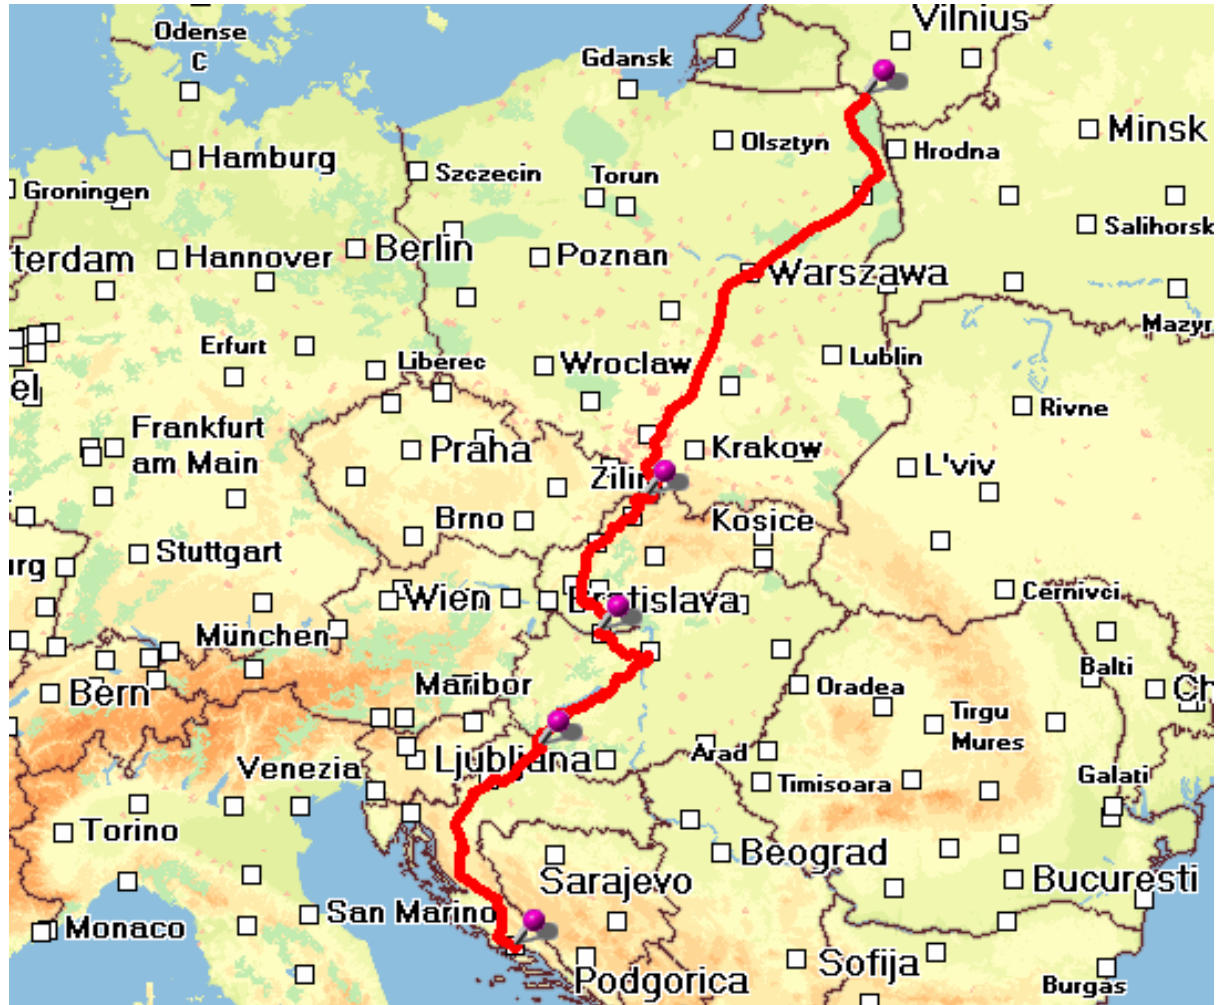

- map panning by right mouse button,
 - zooming in/out by mouse wheel,
- and also new possibilities for transport route display (more information follow).

Displaying of transport route on map

New function – displaying transport route on the map considering infrastructure parameters will be accessible after the upgrade procedure of RailMap map base.

It means that transport route will not be displayed as broken line from the dispatch station via the boarder stations to the destination station. Newly the transport route will be displayed as the shortest route based on the information from the railway infrastructure.

Purchasing of the territorial infrastructure module is necessary for this functionality to work.

This function is activated in Services menu. Select the item Settings and bookmark “RailMap”.

There is a new parameter “Displaying transport route on map”. There are two possibilities – “Show transport route in detail with labels” or “Show transport route in detail without labels”.

It is possible to disable labels with information about tariff distances and freight for every section of the transportation.

The function “Displaying transport route on map” is now accessible from every tariff module and the OPTIM module. We are planning to enlarge this function to all domestic and international distance tables.

Modules modifications

TVZ CD / CD tariff for wagon consignment transportation (2.77.00)

Information about changes in tariff by 1 January 2010 was issued by CD railways.

The changes include:

Installation instructions in the RailMap application

Version: RailMap - PTV Europe City Map Premium 2009

1. Uninstall previous version RailMap – Map Release 12:

- *If you have previous version of RailMap in your PC, please uninstall it. Option Start – Control Panel – Add or remove programs – „ERIC Desktop – RailMap“ - by pressing „Change or Remove“ button, confirm that you want to uninstall „ERIC Desktop – RailMap – Map Release 12“.*

2. Install RailMap - PTV Europe City Map Premium 2009

- *For this installation it is necessary to be logged as administrator and to have 2,5 GB free space on local disc.*
- *Start the installation only on PC where the local or the net version of program ERIC Desktop is installed and for which you purchased your RailMap module.*

- Insert *ERIC Desktop DVD* of the 11/2009 version into the DVD drive and from *RailMap* directory run the file "*Install_RailMap_PTV2009.exe*".
- If you don't have current DVD version you can download the most recent installation zip archive „*INSTALL_RAILMAP_PTV2009.zip*“ (1GB) from internet site: <http://servis.jerid.cz/eric>. Access information to the service area is: name: "eric", password: "SltGQNU6TSvm". Downloaded archive unzip to any directory and run the file „*INSTALL_RAILMAP_PTV2009.exe*“.
- In the window for target directory it is recommended to keep *C:\Program Files\Jerid\RailMap_PTV*
- By pressing the „Install“ button, run the installation.
- Program displays running of the installation. After the installation is finished the installation of “Map Server 5” application will run automatically. This installation is not user adjustable.
- After installation you can run the ERIC Desktop program with new “RailMap” application.

Completely uninstall

- RailMap (except MapServer 5 components) it is possible to uninstall by option “Add or remove programs – RailMap – PTV Europe City Map Premium 2009”.
- MapServer 5 components it is possible to uninstall by option “Add or remove programs – MapServer 5 COM-modules”.

Instructions for modules update in the ERIC program

- Insert ERIC Desktop DVD of the 11/2009 version into the DVD drive.
- Start the ERIC Desktop program (if you are already running the program, you must quit it and start it again to release all modules from memory. Once you are done, follow the steps below).
- In Services menu selected Modules update items.
- In a dialogue box set path to directory „Modules“ on that DVD. This can be done by means of „Drive“ combo box, which contains a list of drivers that are connected to your PC.
- By pressing the „Select“ button, run the modules update and follow the update procedure instructions.
- To verify whether the update was done correctly you can compare the numbers of the modules versions (in the „Help / About modules / About program“ menu item) with the version numbers in this bulletin.

If you have received a new module into your license, you should do the standard update twice. Otherwise the new module will not work. (During the first update, data in the license will be updated and during the second update the corresponding module will be copied to your PC according to the updated license information).
